

TNS – The TV Collection

for eBay Auction December 5-15, 2003

The Single Largest Private Collection of TV Memorabilia

TNS has been engaged in supplying television information to media outlets since 1960. During the past thirty-nine years the company has accumulated what is probably the most complete archive of television information in the world. The files have been maintained consistently throughout this period.

MOVIES:

The movie files encompass 28 file drawers of press releases, photographs and general information about movies that have appeared on television - both feature films and movies made expressly for television. We estimate there are 20,580 photos and 42,728 sheets of paper covering 6,860 movies.

BIOGRAPHIES

The 36 file drawers of biographical information cover Hollywood stars, television stars and those performers associated with the music industry. These files include photographs, press releases, interviews, biographical information and articles that have appeared in other publications. We estimate there are 26,460 photos and 54,936 sheets of paper covering 26,460 performers.

TELEVISION PROGRAMS

There are 26 file drawers of television shows that are currently running or have run through the years. Many of the programs are still running in syndication in the United States and abroad. These files include episodic press releases and photographs. We estimate there are 19,110 photos and 36,624 sheets of paper covering every show that aired on television from 1960 forward. There are some shows in the files that aired prior to 1960 but material is sparse primarily because not much information was released by the networks in those days nor was much published by local newspapers who viewed television as a threat to their advertisers.

COLOR SLIDES

Slides are currently archived in notebooks. We estimate there are approximately 24,000 color slides.

PHOTO CD'S

Today photos are sent on CD's and there are already approximately 75 CD's on file.

AUDIO CASSETTE INTERVIEWS

There are approximately 700 taped interviews with celebrities that appear on television.

VIDEO TAPES

There are over 1,500 videotapes of television movies, specials, documentaries and syndicated shows.

Features, Columns, Interviews and Question and Answer Columns

Over the years, thousands of each have been written. Unfortunately, not all were clipped and saved but there are hundreds still on file. Each week, features are being written and published on Hot News, Best Two Weekly Video Releases, Critic's Choice of the Week, Top Television Broadcast of the Week, Question and Answer Feature, Best PBS Show of the Week, Best Two Movies of the Week, Best TV Sports of the Week, TV Country, Best TV Show of the Night, and A selection of Movies for each night by Genre.
